Introduction

IES5028M-4GS is a high performance, cost-effective high-end intelligent modular switch which supports 24 Fast Ethernet Ports and 4 Gigabit Ethernet ports. This product provides 3 groups of 8 Fast Ethernet interface module, 1 groups of 4 Gigabit interface module. The type of interface can be matched according to need. The IES5028M-4GS is a gigabit managed industrial switches, by Shenzhen 3onedata technology Co., Ltd independent research. IES5028M-4GS switch provide senior management functions, such as: SW-Ring, virtual local area network, trunking, quality of service QoS, rate control, port mirroring, fault alarm and firmware online upgrade. SW-Ring™ is an arithmetic designed as a rapid redundancy network. It provided recover technology for fault of rapid redundant network, the recovery time<20ms. Aiming at the security problems appearing in the LAN, the security function of 802.1x authentications is provided, and the visual WEB operation interface is provided.

Product accorded to CE, FCC standard and Industry grade 4 design requirement, support 2 channel power input and 1 channel relay alarm output, and -40～75℃ working temperature, can meet all kinds of Industrial environment requirement. It can use in power, water conservancy, transportation area etc.
