Introduction

IES618-2F-4D(RS-485)-P(12/48VDC) is a industrial, management, redundant industrial Ethernet switch and integrate 4 port RS-485/422 serial device server, it support 6 port 10/100M Ethernet(RJ45), 2 port 100M fiber, 4 port RS-485/422, 2 redundant 12~48VDC power input and 1 relay alarm output, it adopt SW-Ring redundant technology (Recovery time<20ms), users can set the redundant easily to increase network reliability, furthermore, it can also support numerous intelligent network management functions, like as IGMP, RSTP, 802.1Q VLAN, QOS, port trunking and port mirroring etc, It adopted no fan, low power consumption design, IP40, corrugate high strength iron shell, the performance is more steadily. It accorded with CE, FCC standard and Industrial 4 class, DIN rail installation and wide operating temperature (-40~85C), it can satisfied some kinds of industrial environment, it can provide reliable and quickly solution for your Ethernet device.
